ADDITIONAL INFORMATION

CUSTOMER DETAILS

Job Number: JN 3801 **Customer:** David Barnett **Location:** 6 Meredith Place, Portsea VIC 3944

SUMMARY

This quote is to install an **eero 6+ mesh WiFi system** to extend the existing eero Pro 7 network throughout the property. The new fibre to the premises (FTTP) connection has been installed in the bedroom, which is not near the original AV cupboard where the data cabling terminates.

The existing **eero Pro 7** will remain in the bedroom as the main router, connected directly to the FTTP NTD. An eero 6+ unit will be positioned in the AV cabinet approximately 15 metres away, providing a **wired backhaul connection** and access to the existing data cable infrastructure for the rear of the house. Downstairs areas will be covered by mesh with data backhaul where available.

A **gigabit switch** will be installed in the AV cabinet to provide wired connections for existing equipment, and **Cat6 Pro patch leads** are included to take full advantage of the faster speeds available on the new FTTP plan.

NETWORK INFRASTRUCTURE

WiFi Coverage

The eero mesh system provides seamless whole-home WiFi coverage with automatic band steering and device handoff between access points. The **WiFi 6 technology** delivers faster speeds and better performance for multiple simultaneous connections.

eero 6+ WiFi 6 Mesh System 3-pack

Wired Connectivity

The gigabit switch in the AV cabinet enables **high-speed wired connections** for devices that benefit from direct ethernet connections, such as smart TVs, gaming consoles, and streaming devices.

Optional: Tidy Cabinet Installation

A simple wall-mounted plastic cabinet can be installed in the bedroom to neatly conceal the FTTP NTD and eero Pro 7 router. This provides a clean, professional finish while keeping the equipment protected and accessible for maintenance.

OPTIONAL EXTRAS — DETAILS

ITEM	PRICE	STATUS
Wall-Mounted Cabinet Simple plastic cabinet installed in bedroom to neatly hide the FTTP NTD and eero Pro 7 router, providing a clean and tidy installation.	$440.00	Not selected
