QUOTE DETAILS

This project transforms your home network from its current bottlenecked state into a professional-grade system with full remote management capabilities.

ADDITIONAL INFORMATION

CUSTOMER DETAILS

Job Number: JN3767 **Customer:** Sue-Ann Higgins **Location:** 62 Cutter Street, Richmond VIC 3121

QUOTE DETAILS

This project transforms your home network from its current bottlenecked state into a **professional-grade system** with full remote management capabilities. Your existing Hills Home Hub infrastructure provides an excellent foundation — we'll replace the outdated 100Mbps switches with **gigabit equipment** and install modern WiFi 6 access points for seamless wireless coverage throughout your home.

We'll coordinate your **NBN upgrade from FTTC to FTTP** (Fibre to the Premises), meeting the NBN technician on-site to ensure the fibre is routed correctly into your office cupboard. Your new connection through **Aussie Broadband** includes our CARBON dashboard access for advanced monitoring and local technician support — no more frustrating calls to Optus.

The project also includes mounting your existing TV in the garage exercise area with a **Google TV Streamer** to access all your streaming apps, plus completing the Bose satellite speaker installation with proper brackets and cable management once your new TV cabinet arrives.

NETWORKING UPGRADE

Why Upgrade?

Your current setup includes two old TP-Link Fast Ethernet switches (100Mbps maximum) which create a significant bottleneck — even with faster NBN, your internal network can't deliver those speeds to your devices. The legacy UniFi access point only supports 2.4GHz WiFi, which is outdated and congested. We'll replace all of this with a **business-grade TP-Link Omada system** that delivers the speeds you're paying for.

What's Included

- **[TP-Link ER706W Router](#)** — WiFi 6 gateway installed in your office, connected directly to the NBN
- **[TP-Link EAP610 Access Points](#)** (x2) — Long-range WiFi 6 coverage for living room and backup unit
- **[TP-Link SG2016P Switch](#)** — 16-port gigabit switch with PoE+ to power access points

Remote Management Benefits

- **Full remote monitoring** — We can see your network health from our office
- **Remote firmware updates** — Security patches applied without a site visit
- **Remote troubleshooting** — We can diagnose and fix many issues remotely
- **You don't need to deal with any of it** — We handle everything

Coverage Note

The living room access point will provide excellent coverage throughout the main house. We're bringing a second access point as a spare — if you find you need coverage to the shed, we can mount it there. However, we expect the living room unit will reach the shed adequately, so the spare may not be needed. If it is, we'll mount it behind the TV to mesh with the living room unit.

NBN INTERNET UPGRADE

Current Situation

You're currently on Optus with an FTTC (Fibre to the Curb) connection. You've contacted Optus multiple times trying to arrange the FTTP upgrade with no success. We'll handle everything.

What We'll Do

- **Switch you to Aussie Broadband** — Australia's leading NBN provider, unlimited data
- **Coordinate the FTTC to FTTP upgrade** — We deal with NBN, not you

🏢 Straight Forward Group Pty Ltd: ABN 78643385184.

- **Meet the NBN technician on-site** — Ensure fibre is routed to the correct location (office cupboard)
- **Handle all the paperwork and coordination** — You don't have to speak to anyone

Your New Plan: 500/50 Unlimited

\$110/month includes unlimited data on a 500Mbps download / 50Mbps upload connection.

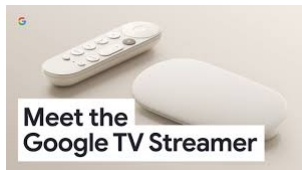

Straight Forward Value-Add

- **CARBON Dashboard Access** — Advanced troubleshooting and monitoring portal
- **Remote diagnostics** — We can test your connection, reset it, and check statistics
- **Local technician support** — If something needs fixing on-site, we're here

GARAGE TV SETUP

What's Included

We'll mount your existing TV on the bracket you already have in your rear garage (exercise area). To turn your older non-smart TV into a fully-featured streaming device, we'll supply and install a **Google TV Streamer**.

Google TV Streamer Benefits

- Access to **YouTube, Netflix, Stan, and all streaming apps**
- Same apps and experience as your main TV
- Voice control with Google Assistant
- Much cheaper than replacing the TV entirely

FOLLOW-UP AV WORK

Satellite Speaker Brackets

During the recent TV and Bose installation, we discovered the existing Bose Cube brackets were incompatible with your satellite speakers. You're sourcing the correct brackets — once they arrive, we'll return to mount them properly.

Cable Management

2/15 Suffolk St Capel Sound 3940

Straight Forward Group Pty Ltd: ABN 78643385184.

Once your new TV cabinet arrives, we'll complete the cable management and general tidy-up below the TV to give you a clean, professional finish.

Recommendation: Power Point

We recommend having an electrician add a power point behind the TV for the cleanest possible installation. This is not included in our scope but worth arranging.

MATERIALS

- 1x [TP-Link ER706W Omada AX3000 Router](#)
- 2x [TP-Link EAP610 WiFi 6 Access Point](#)
- 1x [TP-Link SG2016P 16-Port PoE+ Switch](#)
- 1x Google TV Streamer

BEFORE WE START

- Please source and have ready the correct Bose satellite speaker brackets
- Confirm your new TV cabinet delivery date so we can schedule accordingly
- Consider arranging an electrician to add a power point behind the TV (optional but recommended)
- We'll need access to the Hills Home Hub, office cupboard, living room, and garage

ASSUMPTIONS

- Existing data cabling in Hills Home Hub is in good working condition
- Data point in living room is functional for access point installation
- Customer supplies TV and existing bracket for garage installation
- Customer sources correct Bose satellite speaker brackets
- NBN FTTP upgrade is approved and scheduled by NBN Co

OPTIONAL EXTRAS — DETAILS

ITEM	PRICE	STATUS
Alarm Upgrade - Bosch Solution 6000 + 4G Upgrade your existing Bosch alarm to Solution 6000 with smartphone app control. Includes Solution Link panel, keypad, 4G module for backup connectivity, and iFob app setup. Arm/disarm from your phone, receive instant alerts, and trigger panic alarms from anywhere.	\$1,250	Not selected
