Professional network upgrade replacing consumer-grade equipment with commercial Omada system. Includes ER706W WiFi 6 router, EAP615-Wall access point with TV hardwiring, NBN battery backup, professional cabling, and transition to Aussie Broadband Enterprise with local support.

ADDITIONAL INFORMATION

CUSTOMER DETAILS

Job Number: JN 3750 **Customer:** Lynn Bentley **Location:** 42, 238 The Avenue, Parkville VIC 3052

SUMMARY

You've been experiencing frustratingly slow internet speeds with your current consumer-grade TP-Link router from iiNet. We're upgrading you to a **professional Omada network system** – the same commercial-grade equipment we install for businesses across Melbourne and the Mornington Peninsula.

We'll replace your existing router with the [TP-Link Omada ER706W](#) – a WiFi 6 business router that delivers significantly faster speeds and more reliable performance. Behind your TV, we'll install an [EAP615-Wall access point](#) with a direct hardwired connection to your TV, eliminating WiFi dropouts and buffering issues completely.

At the same time, we're transitioning your internet service to **Aussie Broadband Enterprise managed by Straight Forward Technology**. This means you'll have local technicians available for any network issues, priority support, and we'll handle all communication with NBN on your behalf. We'll coordinate with Aussie Broadband about your NBN connection box (NTD) – either

a backend upgrade or onsite upgrade will be arranged at no additional charge once you're with Aussie Broadband.

The result? Commercial-grade reliability, faster speeds, and professional support – all the benefits of enterprise networking right in your home.

MATERIALS

- [TP-Link Omada ER706W WiFi 6 Router](#) – AX3000 dual-band business router with Omada cloud management
- [TP-Link EAP615-Wall Access Point](#) – Wall-mounted WiFi 6 access point with integrated ethernet ports for TV hardwiring
- NBN Battery Backup – Keeps your internet running during power outages
- Network Cables & Cable Management – Professional-grade cabling and tidy installation

BEFORE WE START

We'll need a recent iiNet bill showing your AVC (Access Virtual Circuit) number. This is essential for coordinating the transition to Aussie Broadband.

OPTIONAL EXTRAS — DETAILS

ITEM	PRICE	STATUS
4G Mobile Backup Router Upgrade Upgrade to a router with built-in 4G mobile backup. If your NBN internet goes down, your network automatically switches to 4G mobile broadband to keep you online. Perfect for reliable connectivity when NBN has issues. IMPORTANT: If you select this upgrade, you must also select the '4G Backup Internet Service' subscription option below (\$130/month instead of \$110/month).	\$250	Selected

SUBSCRIPTIONS — DETAILS

SUBSCRIPTION	INVESTMENT	STATUS
Standard Internet Service Professional NBN internet managed by Straight Forward Technology via Aussie Broadband Enterprise. Includes priority support, local technicians, and we handle all NBN communication on your behalf. SELECT THIS OPTION if you're NOT adding the 4G Mobile Backup Router Upgrade above.	\$110/month	Not selected
